## **PRESENTACIÓ**

El propòsit principal d'un Butlletí de Sumaris és la màxima difusió de la informació actualitzada que proporcionen les publicacions periòdiques. El Butlletí de Sumaris del COEC aplega, mensualment, els sumaris de les revistes d' Odontostomatologia i de matèries afins que es reben a la Biblioteca.

En cada número es dóna la relació dels títols d' aquestes revistes a continuació de la presentació. Els sumaris estan ordenats, al Butlletí, alfabèticament pel títol, essent també accessibles per la matèria general de la revista mitjançant l'Index de Matèries del Butlletí.

Aquesta eina bibliogràfica permet aproximar el perfil d'interés del lector al contingut de les principals publicacions periòdiques d'Odontostomatologia, sense necessitat d'estar-hi subscript. Totes les revistes relacionades es troben a la Biblioteca, de manera que l'usuari pot demanar, si li interessa, còpia de qualsevol dels articles citats.

## COVER IMAGE

### PAPUA NEW GUINEA, 1964: A DENTAL AUXILIARY

The cover images in volume 210 of the Journal feature dentally-themed postage stamps from around the world. This stamp, issued in Papua New Guinea in 1964 as part of a set to commemorate health-care in the islands, depicts a dental auxiliary from Port Moresby Dental College treating a child. Much of the dental care for children in Papua New Guinea is provided by dental auxiliaries.

## COVER IMAGE

### SRI LANKA, 1950: THE TEMPLE AT KANDY

The cover images in volume 210 of the Journal feature dentally-themed postage stamps from around the world. Kandy in Sri Lanka, formerly Ceylon, is the site of a Buddhist temple in which is contained a tooth of the Buddha. The temple has been depicted on a number of stamps issued locally, including this airmail stamp from 1950 which shows the Octagon Library at the temple.

## Encuentros

Existen dos métodos para resolver laberintos dependiendo de si los miramos como una unidad o bien como un conjunto de unidades. En el primero de ellos, empezamos en un punto determinado y debemos llegar al siguiente para llegar hasta el final; en el otro método lo que se hace es mirar todo el laberinto e invalidar pasadizos; de esta manera, solo quedará la solución.

Para resolver un laberinto o los problemas a los que nos enfrentamos en nuestra empresa, precisamos definirlos. Para definir el problema precisamos información. Para disponer de información precisamos conocimiento. El conocimiento se recibe de la experiencia. La experiencia se transmite de unos a otros de voz o de forma escrita en determinados puntos de encuentro.
