PRESENTACIÓ

El propòsit principal d'un Butlletí de Sumaris és la màxima difusió de la informació actualitzada que proporcionen les publicacions periòdiques. El Butlletí de Sumaris del COEC aplega, mensualment, els sumaris de les revistes d' Odontostomatologia i de matèries afins que es reben a la Biblioteca.

En cada número es dóna la relació dels títols d' aquestes revistes a continuació de la presentació. Els sumaris estan ordenats, al Butlletí, alfabèticament pel títol, essent també accessibles per la matèria general de la revista mitjançant l'Index de Matèries del Butlletí.

Aquesta eina bibliogràfica permet aproximar el perfil d'interès del lector al contingut de les principals publicacions periòdiques d'Odontostomatologia, sense necessitat d'estar-hi subscript. Totes les revistes relacionades es troben a la Biblioteca, de manera que l'usuari pot demanar, si li interessa, còpia de qualsevol dels articles citats.

Abducens nerve (cranial nerve VI)

Old toothbrushes on display at Saatchi Gallery p247

Clinical simulation centre opened p249

COVER IMAGE

ABDUCENS NERVE (CRANIAL NERVE VI)

The cover images in volume 211 of the Journal depict the 12 cranial nerves, showing both their origin in the brain and the areas that they innervate. This issue's cover features the abducens nerve (shown in bright yellow) which serves the lateral rectus muscle of the eye, illustrated here cut and folded back to reveal the nerve in question. Other nerves on the illustration are shown in paler yellow to distinguish them from the featured cranial nerve; they include the pterygopalatine and ciliary ganglio and the infraorbital, zygomatic and ciliary nerves.
